Summary

I've been developing and working since 2016. I am very proud of my career paths, though I believe the best is yet to come. Raising my standards for new challenges, I aspire to grow as a developer continuously learning more about the latest technologies and developments that are coming out of the tech ecosystem. I believe in a combination of humbleness, passion, dedication, hard work, and fun for a successful path.

Work Experience

Software Engineer

03/2020-Present

Moteefe

Lisbon, Portugal

In my first team, we had the mission to increase the conversion rate of the platform and provide the best checkout experience to the user. Later, I decided to switch to a new team that was being created at the time, whose goal was to remove the front-end code from the back-end monolith Ruby on Rails to Next.js.
